

U.S. Nemrod

Seeing this vintage dive mask for sale on eBay brought back memories of my early days in graphic arts and offset printing.

I did the two-color packaging art work, the layouts, shot and stripped the plate-ready negatives, for Nemrod's dive mask (original shown below), swim fins, and snorkel.

Delivered in twenty four hours, this job would be charged at \$4,500.00 in 2021 dollars.

Connecticut Construction Quarterly

This vintage cover was created for a magazine that was published quarterly.

The artwork and half-tones were produced using an Agfa Gevert Repromaster camera.

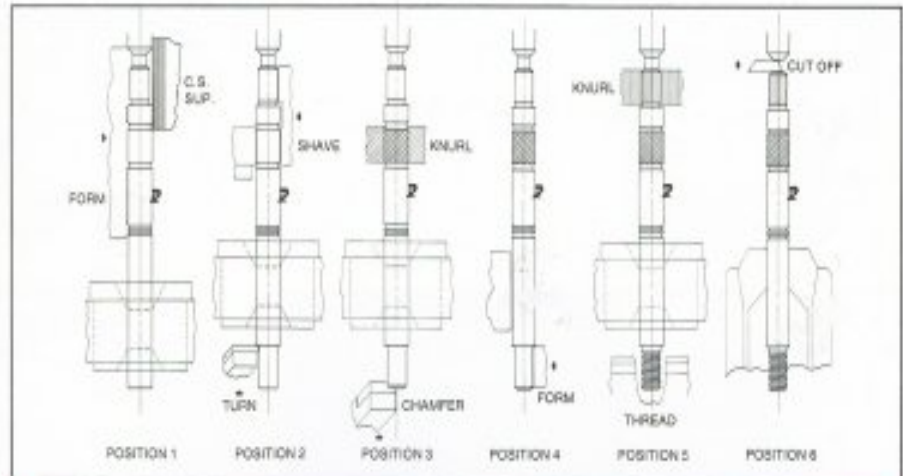

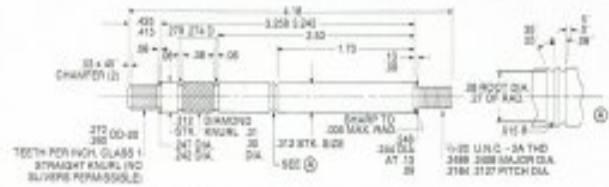

New Britain Machine

Drawings on this specification sheet were done on a drafting table using drawing pens, and an IBM Selectric Composer to set the type.

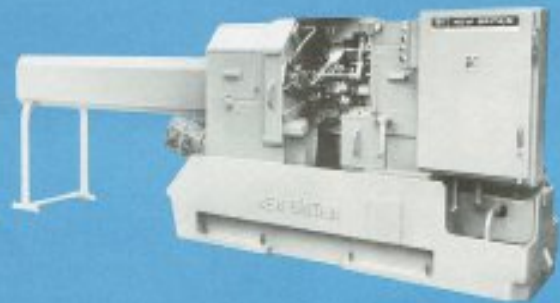

Part Specifications:

Pump Shaft
 Material: C-1138 Annealed Steel
 Bar stock OD - .312"
 Part length - 4.18"
 Spindle speed: 2551 rpm
 Cutting speeds: 215 sfm forming
 363 sfm turning
 Production: 945 pieces per hour gross

Brief Specifications:

Number of Spindles	5
Maximum Capacity, Round	1"
Tool Stake Travel	4"
Maximum Feed, Lower Slides	1"
Maximum Feed, Middle Slides	1"
Maximum Feed, Upper Slides	1"
Spindle Speed, rpm	265-4470
Coolant Capacity, gallons	125
Idle Time, seconds	0.83
Maximum Die Head Diameter	3 1/2"
Motor hp	10-15
Approximate Net Weight, lb	10,500

Precision Studio

Below is a triple-fold brochure, and business card. The black on white cover is in the foreground. The background is the inside unfolded. Justified text at the bottom of this page was done on an IBM Selectric Composer. The remaining text (in the center and around the circle), was done with transfer lettering.
